XFT Software for Products & Quality

Ensure Top-Quality Products with SAP

Optimize Quality Management in Product Development and Product Change

Product development and change management is where the future of your business takes shape. After all, creating competitive products is essential to the long-term survival of any business.

The processes involved in new product development and product change (change requests, change orders, changes in production) are highly complex. But they can be drastically simplified – within your familiar SAP environment.

With XFT software for products and quality, you can:

- ⊘ Gain the transparency needed to control product development and product change across departments and business areas.
- ⊘ Issue and keep track of quality guidelines and work instructions.
- ⊘ Share and collaborate on various tasks such as drawings, specifications, and quality requirements with customers and suppliers.
- ⊘ Perform sampling in line with PPAP and PPF requirements and automatically create reports.
- ⊘ Create new material masters without duplicates or incorrect master data.

Product Development and Product Change in SAP

Highest quality management

Keep control of collaborative processes, implement changes in less time, consistently meet quality speci-fications, and manage complex projects. XFT products help you do all this and more. From standardized products to software tailored to your specific needs, our add-ons for your SAP systems are designed to help you get much more out of your existing system as quickly as possible. And if your demands grow, you can instantly add further products and tailored solutions.

XFT PPAP File

Create sample documents in accordance with PPAP or PPF quicker than ever before.

- Guarantee work is compliant with standards.
- Create documents automatically.
- Greater transparency over processes and results.

XFT Material Creation

Create new materials in your SAP system quickly and without redundancies.

- Prepare and check master records without creating system data too early.
- Creation and assignment of documents is simplified.
- More efficient data administration in your plants.

XFT Project File

Manage complex projects more effectively and transparently.

- Centrally manage tasks, employees, appointments, and more.
- **Clearly document results.**
- Support checks and approval via workflows.

XFT Change Manager

Implement product changes quickly and ensure they are well documented.

- Keep a detailed, central record of proposed changes and change requests.
- Communicate with all involved departments and suppliers.
- Hand over complete documents to production plants.
