XFT Software for Products & Quality

Ensure Top-Quality Products with SAP

Optimize Quality Management in Product Development and Product Change

Product development and change management is where the future of your business takes shape. After all, creating competitive products is essential to the long-term survival of any business.

The processes involved in new product development and product change (change requests, change orders, changes in production) are highly complex. But they can be drastically simplified – within your familiar SAP environment.

With XFT PLM & QM Suite 4S4 you are able to:

- ✓ Gain the transparency needed to control product development and product change across departments and business areas.
- ✓ Share and collaborate on various tasks such as drawings, specifications, and quality requirements with customers and suppliers.
- ✓ Perform sample inspection in line with PPAP and PPF requirements and automatically create reports.
- ✓ Create new material masters without duplicates or incorrect master data.

Highest quality management

Keep control of collaborative processes, implement changes in less time, consistently meet quality specifications, and manage complex projects. XFT products help you do all this and more. From standardized products to software tailored to your specific needs, our add-ons for your SAP systems are designed to help you get much more out of your existing system as quickly as possible. And if your demands grow, you can instantly add further products and tailored solutions.

XFT Change Manager 4S4

Manage changes to products and production processes in real-time clearly and in detail.

- Document and implement change processes centrally.
- Automatically create context-specific tasks for involved processes.
- Monitor change processes across all specialist departments and systems.

XFT Material Creation 4S4

Create new materials in your SAP system quickly and without redundancies.

- Prepare and check master records without creating system data too early.
- Creation and assignment of documents is simplified.
- More efficient data administration in your plants.

XFT PPAP File 4S4

Design the entire sample inspection process according to PPAP or PPF efficiently in SAP.

- Create sample inspection reports automatically.
- Implement hybrid collaboration scenarios with suppliers via SAP BTP.
- Analyze sample inspection processes using dashboards.

XFT Document Composer 4S4

Create your QM documents automatically with Word, Excel or PDF - based on your SAP data.

- Create documents in a secure SAP process environment.
- Avoid external steps and switching between systems in daily work.
- Create new templates easily.

XFT Project File 4S4

Manage complex projects more effectively and transparently.

- Centrally manage tasks, employees, appointments, and more.
- **Clearly document results.**
- Support checks and approval via workflows.
