XFT Solution Suite 4S4

A solution for everything

Your foundation for customer-specific process solutions with SAP S/4HANA

Looking to fully integrate your core processes into SAP S/4HANA? The XFT Solution Suite 4S4 provides the ideal foundation for exactly that.

Leverage the seamless integration of SAP HANA data and objects together with our XFT products as the stable foundation for your business processes. With connectors for hybrid architectures, process steps executed in the SAP Cloud or in third-party systems remain fully transparent and efficient.

The XFT Solution Suite 4S4 is your ideal platform and replacement for legacy processes that need to be migrated as part of your SAP S/4HANA transformation.

With XFT Solution Suite 4S4 you can:

- ✓ Rapidly implement new solutions.
- ✓ Benefit from high system stability.
- ✓ Make flexible adjustments.
- ✓ Integrate data, documents, and tasks.
- ✓ Achieve a high degree of process automation.
- ✓ Enjoy ease of use and a proven user interface.

Your bridge to a seamless SAP S/4HANA transformation

How to streamline your processes

SAP Fiori interfaces (SAPUI5) play a central role in SAP S/4HANA and also in the XFT Solution Suite 4S4. Our SAP Fiori interfaces developed by XFT are based on SAP-certified XFT software and offer one of the most powerful feature sets available on the market. These generic functions form the foundation for a wide range of XFT applications – without any modifications to the SAP standard.

Which area are you looking to improve? Here just a few examples:

Sales project management

Our customers get the best out of sales and engineering – with a solution that brings everything together.

- Project file for a product or machine in the development phase (SAP PLM)
- Integration of sales processes including quotation management (SAP SD)
- SAP-integrated approval workflows and documentation

Management of house connection projects

Our customers keep full control of their connection objects – with the perfect solution for utility companies.

- Electronic file management for house connection documentation (SAP IS-U)
- Project management and billing of connection projects
- Correspondence generation within the Customer Service Center

Third-party funding management for research projects

Our customers use third-party funds efficiently – with a tailored solution for universities and research institutions.

- Project file including complete research project documentation
- Creation of all required documents and forms
- Integrated SAP processes for budget allocation and release (SAP FI + CO)

Loan file & claims process management

Our customers manage loans effortlessly – with a customized solution for banks and insurers.

- Electronic file management for customers and loans (SAP CML)
- Document generation with integrated approval workflows
- Deadline monitoring, email integration, and collaboration
