

XFT PPAP Collaboration

Set a new standard for supplier PPAP collaboration

Optimize your supplier sample inspection approvals efficiently and transparently, fully integrated on SAP BTP.

In an increasingly connected and dynamic industrial world, the quality of collaboration with suppliers determines market success. Especially in the Production Part Approval Process (PPAP), smooth, fast, and transparent coordination is essential.

In the traditional PPAP process, documents and inspection records are often exchanged via e-mail, manually, or through external (non-SAP) portals – prone to errors, lacking transparency, and difficult to scale on both sides of the value chain.

XFT PPAP Collaboration sets a new standard for supplier collaboration within the PPAP process – fully integrated, highly automated, and 100 % within SAP.

With XFT PPAP Collaboration you are able to:

- ✓ Provide your suppliers direct access to SAP BTP collaboration via a secure link for easy access.
- ✓ Navigate efficiently to the desired collaboration process
- ✓ Upload documents via drag & drop and capture data in real time.

PPAP processes digital, transparent & 100 % SAP-integrated

End-to-End-Collaboration on SAP BTP

XFT PPAP Collaboration on SAP BTP sets a new standard for the Production Part Approval Process by enabling structured supplier collaboration, seamless document exchange, and integrated approvals within SAP quality processes.

Your Benefits at a Glance

Reduced Lead Times

Documents are immediately available, inquiries are targeted, and approvals are faster – enabling a quicker time-to-market.

Higher Process Quality

Mandatory fields and structured requirements prevent missing documents, version conflicts, and quality issues during series production (SOP).

End-to-End SAP Integration

All data flows seamlessly from suppliers through quality management to procurement, production, and engineering in SAP – ensuring maximum transparency.

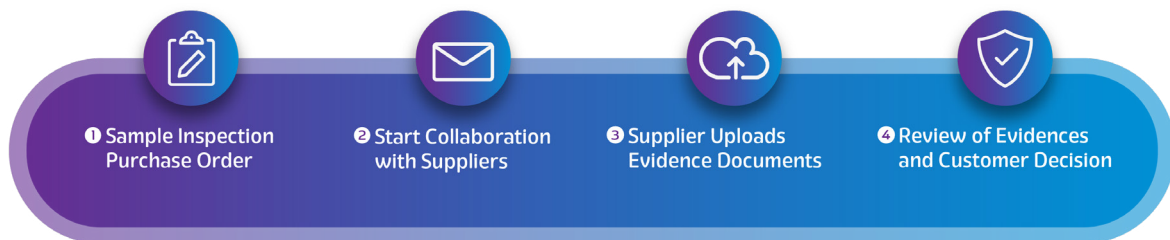

Cost Savings

Eliminating manual tasks such as email communication, manual filing, tracking, and data transfer significantly reduces administrative effort. Quality and purchasing departments can focus on value-adding activities.

Faster time-to-market

Digital processes, clear responsibilities, and transparent workflows significantly shorten the sample inspection process. Products reach series production faster – a crucial competitive advantage in dynamic markets.

How It Works – Step by Step
