About XFT Machine File 4S4

Improve Service – Identify Problems Quickly

Many complex machines lead a long life at the customer's site. For this reason, predictive maintenance and servicing and fast service in the event of machine breakdowns are essential. XFT Machine File 4S4 is now available to bring together all SAP documents and records for a machine in a central location from the very beginning. This allows you to keep an overview of all work that has been carried out on the machine and where this machine has been used.

Overview of Features

Machine File

- One file per machine
- Filing of documents to the machine, e.g:
 - Damage photo
 - Maintenance report
- Display of the most important equipment data, such as:
 - Status
 - Planner group, planning plant
 - Customers, end customers, operators
 - Start of operation

Synchronization

- Link to the corresponding sales document
- Synchronized storage of DVS documents to the equipment
- Synchronized integration of:
 - Customer orders and deliveries for repairs
 - service notifications, service orders and maintenance contracts
 - Orders, order requirements
 - Integration with multiple systems is possible

Equipment Usage List

- Clear presentation of the temporal change of certain data concerning the equipment, e.g:
 - Functional location
 - Installation location

- Customer, end customer, operator

SAPUI5 Web-Application

- Access via a tile on the SAP Fiori Launchpad
- Search for machine files
- Display of header data
- Display of linked documents grouped by notification type, order type, etc.
- Display of associated sales files

Integration in SAP ERP und die XFT-Produktlandschaft

- Jump to the equipment, the equipment bill of material and the equipment structure list
- Visualization of the equipment parts list from the file view
- Display of details and document flow for sales orders and deliveries from the file view
- Integration into the XFT Sales Manager, especially through customer and order files
- Connection to upstream CRM or ticket systems is possible for the integration of further information
- Jumps to the file via the generic object service (GOS)
- Certified SAP Add-on - 100% compatible with SAP ERP and S/4 HANA
- Extensive expansion possibilities of the functions
